DEVICE	SIGNAL	DESCRIPTION	PROJECTED AREA SQ. FT.	WEIGHT POUNDS
A	TS-I, T31	12" 3 section polycarbonate with backplate	8.67	40
	TS-IL, T32			
	TS-IR, T33			
B	TS-ILL, T51B TS-IRR, T52B	12" 5 section polycarbonate with backplate	13.33	55
C	TS-ILL, T51 TS-IRR, T52	12" 5 section polycarbonate with backplate mounted on side of pole	13.33	55
D	PS-I, PI3	12" I section polycarbonate on side of pole	1.56	30
E	SIGN	aluminum variable message sign on span	7.0	30
F	SIGN	street name sign located on the far right of the intersection side of pole	27.00	60

DESIGN CRITERIA:

- 1) Loading and allowable stress criteria: 80 mph as per current AASHTO "Standard Specifications for Structural Supports for Highway Signs, Luminaires and Traffic Signals".
- 2) All structures are designed to support the maximum loading shown with a span wire sag of 5% and tether wires that break away at a maximum load of 900 lbs.
- 3) The traffic signals and signs shown may be placed at any location on the span wire, provided that the minimum spacing shown is maintained.
- 4) All structures are designed to support a 15' maximum length luminaire arm at 40' maximum luminaire mounting height, while supporting a luminaire having a maximum projected area of 3.3 square feet and a maximum weight of 75 pounds.

REINFORCED HANDHOLE
AND GROUNDING NUT DETAIL

LIN POLE SERIES

GENERAL NOTES:

- 1) Each pole shaft shall be furnished with all miscellaneous hardware necessary to complete the installation, except pole bands to be furnished by others.
- 2) The pole shaft shall be galvanized to comply with ASTM-123.
- 3) The miscellaneous hardware shall be galvanized to comply with ASTM-153.
- 4) A letter of certification from the manufacturer, stamped by a professional engineer, shall be submitted certifying compliance to these specifications, along with shop drawings and if requested calculations for verification of compliance.
